

Sample Question Paper
Subject: Informatics Practices

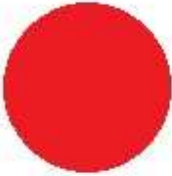

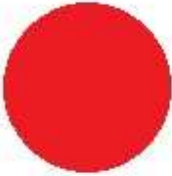

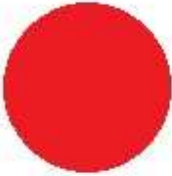

Class: XII

Session 2016-17

| Time: 3 Hrs. | | M.M. – 70 | |
|--------------|-----|---|---|
| 1 | (a) | After realizing the issues with proprietary software, Ms. Sunita has decided to use only Open Source Software. Suggest any one suitable open source software to her, for each of the following categories: i. Operating System ii. Browser | 1 |
| | Ans | i. Linux or Google Chrome OS or any other open source OS (½ Mark for correct answer) ii. Mozilla Firefox or Google Chrome or any other open source browser (½ Mark for correct answer) | |
| | (b) | Expand the following: i. ODF ii. PPP | 1 |
| | Ans | i. Open Document Format ii. Point to Point Protocol (½ Mark for each correct answer) | |
| | (c) | What is Domain Name Resolution? | 1 |
| | Ans | Domain Name Resolution is the process of getting corresponding IP address from a domain name. (1 Mark for correct answer) | |
| | (d) | How a Phonetic text entry is different from Keymap based text entry? | 1 |
| | Ans | Phonetic text entry is different from keymap based text entry as in the keymap based text entry keyboard keys are mapped to specific characters using a keymap whereas in phonetic text entry text translation is done by some software based on probable pronunciation of the entered text. (1 Mark for correct difference) | |
| | (e) | Which of the following activity can be termed as Eavesdropping: i. If Jack sets up an unauthorized parallel telephone line to capture the data. ii. If Jill has stolen his friend's keyboard. iii. If Martina installs some receiver hardware to capture the data while on its way. iv. If Kim gets someone's login information by casually watching what | 2 |

| | | |
|-----|--|---|
| | <p>he/she is typing.</p> <p>Select the best suitable option from the following:</p> <ul style="list-style-type: none"> i. Option i only ii. Option ii only iii. Option i and ii both iv. Option i and iii both <p>How Eavesdropping is different from snooping by mentioning any one activity which will be termed as snooping?</p> | |
| Ans | <p>iv. Option i and iii both</p> <p>(1 Mark for correct answer)</p> <p>Snooping refers to gaining unauthorized access to another person's or organisation's data: For e.g. Reading the files on someone's computer in an unauthorized manner.</p> <p>(1 Mark for correct answer)</p> | |
| (f) | <p>It's an era of networking! Almost everyone and everything is connected through one way or the other, hats off to the technology. We have never been so much linked as we are today.</p> <p>Daniel has just started his hands on practice of networking. Help him in the following:</p> <ul style="list-style-type: none"> I. He has just connected 10 computers of his resource room to establish a network. Name the network (LAN/MAN/PAN/WAN) which will be formed. Mention any two main benefits which Daniel could achieve by establishing a network. II. Help him in identifying the correct topology which has following characteristics: <ul style="list-style-type: none"> ▪ Its very easy to diagnose the fault in this topology. ▪ Failure of central hub/switch leads to failure of the entire network. <p>Depict the topology by drawing the diagram showing 4 interconnected computers through central hub/switch..</p> | 4 |
| Ans | <p>i. LAN</p> <p>(1 Mark for correct answer)</p> <p>Benefits of Networking:</p> <ul style="list-style-type: none"> ▪ Resource sharing ▪ Cost saving <p>(½ Mark for each correct benefit)</p> <p>ii. Star Topology</p> <p>(1 Mark for correct answer)</p> | |

| | | | |
|---|-----|---|---|
| | |  <p>(1 Mark for correct diagram)</p> | |
| 2 | (a) | <p>Shalini is learning Java programming language, as it allows developers to write code that can run on any machine, regardless of architecture or platform. Help her in finding solutions of her problems:</p> <p>I. She wants to compare two integer values for equality in her java code. Out of (=) and (==), which operator she should use and why?</p> <p>II. Help her in writing Java code to initialize two integer variables named num1 and num2 with values 5 and 10 respectively. Increase the value of num1 by 5 and decrease the value of num2 by 5.</p> | 4 |
| | Ans | <p>I. == operator As = operator is assignment operator which will be used to assign the values to any variable/constant while == is comparison operator for equality.</p> <p>(1 Mark for correct answer) (1 Mark for correct explanation)</p> <p>II. int num1=5, num2=10; num1=num1+5; num2=num2-5;</p> <p>(½ Mark for each correct statement)</p> | |
| | (b) | <p>Mr. Sahil, a programmer in a VISA processing company, has written the following code:</p> <pre>int ch=Integer.parseInt(jTextField1.getText()); switch(ch) { case 1: jTextField2.setText("Short Term Single Entry Visa Granted"); case 2: jTextField2.setText("Short Term Multiple Entry Visa Granted"); case 3: jTextField2.setText("Long Term Single Entry Visa Granted"); case 4: jTextField2.setText("Long Term Multiple Entry Visa Granted"); default:</pre> | 2 |

| | <pre> jTextField2.setText("Invalid Entry"); } </pre> <p>No matter what value is being entered in the text field jTextField1, this program always give a message "Invalid Entry". Help Mr. Sahil in identifying the problem and its reason. Also suggest him a suitable correction in the code.</p> | | | | | | | | | |
|--------------------------|--|--------------------------|--|--------|--------|--------|---|--------|---|---|
| Ans | <p>In absence of break 'fall through' condition occurs. As a result control will not be able to come out of the switch block after first matching. So all the messages will be overwritten by the last message i.e. "Invalid Entry" due to setText() method.</p> <p>He should use break statement in each case.</p> <p>(1 Mark for correct identification of the problem and reason) (1 Mark for correct correction)</p> | | | | | | | | | |
| (c) | <p>Realizing the importance of the Internet, Ms. Shikha a Mathematics teacher, has decided to use Internet as a medium to teach her students Mathematics in an interesting way.</p> <p>I. She wants to design a webpage as shown below to create a mathematics tutorial on the topic "Shapes" using HTML.</p> <table border="1" data-bbox="331 1032 866 1559"> <thead> <tr> <th colspan="2">Mathematics in a fun way</th> </tr> <tr> <th>Shapes</th> <th>Images</th> </tr> </thead> <tbody> <tr> <td>Circle</td> <td></td> </tr> <tr> <td>Square</td> <td></td> </tr> </tbody> </table> <p>She has written following HTML code for the same but she is not getting the desired output. Help her in identifying the error(s) and suggest the suitable corrections:</p> <pre> <html> <head><title>Shapes</title></head> <body> <table> <tr> <table heading>Mathematics in a fun way</table heading> </pre> | Mathematics in a fun way | | Shapes | Images | Circle |  | Square |  | 4 |
| Mathematics in a fun way | | | | | | | | | | |
| Shapes | Images | | | | | | | | | |
| Circle |  | | | | | | | | | |
| Square |  | | | | | | | | | |

```

</tr>
<tr>
<td>Shapes</td>
<td>Images</td>
</tr>
<tr>
<td>Circle</td>
<td><img source="circle.jpg"></td>
</tr>
<tr>
<td>Square</td>
<td><img source="square.jpg"></td>
</tr>
</table>
</body>
</html>

```

II. Help her in matching Column A with suitable statements of Column 'B'

| Column A | Column B |
|--|--|
| XML | We use predefined tags to design webpages. |
| It is designed to store and transport data | HTML |
| Tags are not case sensitive | XML |
| HTML | Elements must have a closing tag. |

Ans

```

<html>
<head><title>Shapes</title></head>
<body>
<table border=1> //Correction 1
<tr>
<th colspan=2>Mathematics in a fun way</th> //Correction 2 & 3
</tr>
<tr>
<td>Shapes</td>
<td>Images</td>
</tr>
<tr>
<td>Circle</td>
<td></td> //Correction 4
</tr>
<tr>
<td>Square</td>

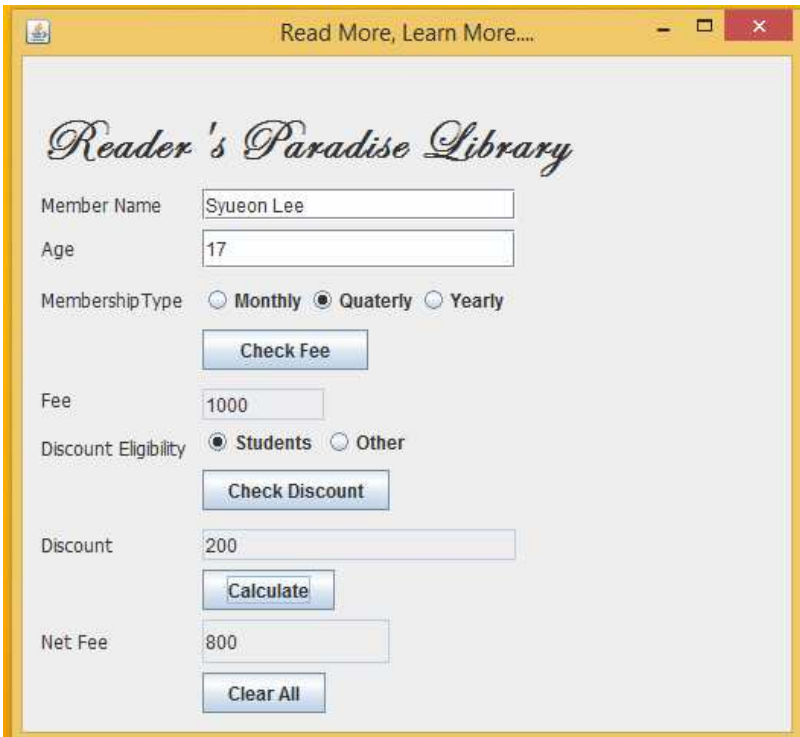

```

| | <pre><td></td> //Correction 4 </tr> </table> </body> </html></pre> <p>(½ Mark for each correct correction)</p> <p>II.</p> <table border="1" data-bbox="331 645 1337 869"> <thead> <tr> <th>Column A</th> <th>Column B</th> </tr> </thead> <tbody> <tr> <td>XML</td> <td>Elements must have a closing tag.</td> </tr> <tr> <td>It is designed to store and transport data</td> <td>XML</td> </tr> <tr> <td>Tags are not case sensitive</td> <td>HTML</td> </tr> <tr> <td>HTML</td> <td>We use predefined tags to design webpages.</td> </tr> </tbody> </table> <p>(½ Mark for each correct matching)</p> | Column A | Column B | XML | Elements must have a closing tag. | It is designed to store and transport data | XML | Tags are not case sensitive | HTML | HTML | We use predefined tags to design webpages. | | |
|--|---|----------|----------|-----|-----------------------------------|--|-----|-----------------------------|------|------|--|--|--|
| Column A | Column B | | | | | | | | | | | | |
| XML | Elements must have a closing tag. | | | | | | | | | | | | |
| It is designed to store and transport data | XML | | | | | | | | | | | | |
| Tags are not case sensitive | HTML | | | | | | | | | | | | |
| HTML | We use predefined tags to design webpages. | | | | | | | | | | | | |
| 3 | <p>(a) In today’s digitized world with a need to store data electronically, it is very important to store the data in the databases. SQL is used to interact with the Database Management System.</p> <p>I. Classify the following commands according to their type :(DDL/DML) i. INSERT INTO ii. ALTER TABLE</p> <p>II. Which clause would you use with Select to achieve the following: i. To select the values that match with any value in a list of specified values. ii. Used to display unrepeated values of a column from a table.</p> <p>III. Chhavi has created a table named Orders, she has been asked to increase the value of a column named salesamount by 20. She has written the following query for the same.</p> <p style="text-align: center;">Alter table Orders Add salesamount =salesamount+20;</p> <p>Is it the correct query? Justify.</p> | 4 | | | | | | | | | | | |
| | <p>Ans: I. i. INSERT INTO : DML command ii. ALTER TABLE : DDL command</p> <p><i>(½ Mark for each correct answer)</i></p> <p>II. a. IN b. Distinct</p> <p><i>(½ Mark for each correct answer)</i></p> | | | | | | | | | | | | |

| | | |
|------|--|---|
| | <p>III. No, Alter command is used to make changes to the structure of the table, but Chhavi has to make changes in the data stored in the table. Hence, she should write the following query:</p> <p style="text-align: center;">Update Orders set salesamount =salesamount+20;</p> <p><i>(1 Mark for the justification)</i></p> <p><i>(1 Mark for the correct query)</i></p> | |
| (b) | <p>I. Name any one Single row function and any one Aggregate function. Also mention the difference in their working.</p> <p>II. Explain why the following queries give different outputs on execution:</p> <p>i. SELECT COUNT(ENAME) FROM EMP; Output: 5</p> <p>ii. SELECT Count(*) FROM EMP; Output: 8</p> | 4 |
| Ans: | <p>I. Single row function : Length() (any single row function) Aggregate Function : Max() (any other aggregate function)</p> <p>A single row functions works on every row of the table and hence gives output for each row in the table. An Aggregate function also known as Multiple row function works on a group of rows and returns only 1 output.</p> <p><i>(1 Mark for the writing any 1 valid Single row and Aggregate function)</i> <i>(1 Mark for writing the difference in their working)</i></p> <p>II. Aggregate functions ignore NULL values. The first query counts the Not Null values in the column ENAME hence the output is 5.</p> <p>But the second query counts all the records present in the table EMP which gives the output as 8.</p> <p>Hence this implies that there are 8 rows in the table and the Ename column contains the name of only 5 employees. $8-5 = 3$, i.e. 3 names have been left blank. This means that there are 3 null values in the column ENAME.</p> <p><i>(1 Mark for giving individual explanation of the queries)</i></p> | |

| | | | |
|---|------|--|---|
| | | <i>(2 Marks for giving individual explanation of the queries along with the reason for difference in the output)</i> <i>(1/2 Mark for identifying the error)</i> | |
| | (c) | Geetanjali had created a table “Customer” in the database “Test”. Immediately after the successful creation of the database, she wrote the Rollback command to undo the creation of the table. Did she execute rollback successfully? Explain. | 2 |
| | Ans: | A table in MYSQL is created using CREATE TABLE command which is a DDL command. A DDL command cannot be rolled back hence she needs to use the DROP TABLE command to remove the table. <i>(2 Marks for the correct answer)</i> <i>(1/2 mark only for the identification of CREATE TABLE as a DDL command)</i> <i>(1/2 Mark only for suggesting the use of DROP TABLE command)</i> | |
| 4 | (a) | Ms. Meena is not able to understand the statement “ Java is a case sensitive language ”. Help her in understanding the above mentioned statement by giving suitable example. | 1 |
| | Ans | Java is a case sensitive language as java distinguish between uppercase and lowercase very strictly. For example: int num1, Num1; Although both variable have same name in the above statement but java will treat them two different variables due to first character in different case. <i>(1 Mark for correct answer)</i> | |
| | (b) | Ms. Rachel is designing a frame in Netbeans in which she has used four Radio Button controls. She want that only one radio button out of four should be selected at a time. Which property of the Radio Button should be selected to acheive the same? | 1 |
| | Ans | buttonGroup <i>(1 Mark for correct answer)</i> | |
| | (c) | What will be displayed in JTextArea1 after the following code is executed: int i; for(i=10;i<50;i=i+30) { i=i+15; jTextArea1.append(""+i); } jTextArea1.append("\n"+i); | 1 |
| | Ans | 25 | |

| | | |
|-----|--|---|
| | 55 (½ Mark for each correct output) | |
| (d) | <p>Do as directed :</p> <p>I. Find the output of the following Java code snippet after execution of each java statement labelled as Stmt 1, Stmt 2, Stmt 3, Stmt 4:</p> <pre>String str1="VASUDHAIVA",str2="KUTUMBAKAM"; jTextArea1.append((str1.substring(0,4))); //Stmt 1 jTextArea1.append((str2.substring(4))); //Stmt 2 jTextArea1.setText(jTextArea1.getText()+jTextArea1.getText().length());//Stmt 3 jOptionPane1.showMessageDialog(null,jTextArea1.getText().length()); //Stmt 4</pre> <p>II. Rewrite the following code using do while loop:</p> <pre>int num=Integer.parseInt(jTextField1.getText()); while(num<=40) { jOptionPane1.showMessageDialog(null,num); num=num*20; } jOptionPane1.showMessageDialog(null,"Bye Bye");</pre> | 4 |
| Ans | <p>I. VASU VASUMBAKAM VASUMBAKAM10 12</p> <p>(½ Mark for each correct output)</p> <p>II.</p> <pre>int num=Integer.parseInt(jTextField1.getText()); do { jOptionPane1.showMessageDialog(null,num); num=num*20; } while(num<=40); jOptionPane1.showMessageDialog(null,"Bye Bye");</pre> <p>(2 Mark for correct code in do while)</p> | |
| (e) | <p>The following code has error(s). Rewrite the correct code underlining all the corrections made :</p> <pre>value1=1, value2=2; while(value1<value2) jTextArea1.append ("\n"+value1*value2; value1++</pre> | 2 |

| | | <pre> } </pre> | | | | | | | |
|-----------------|---|-----------------|-----|---------|-----|-----------|------|--|--|
| Ans | <pre> int value1=1, value2=2; //Correction 1 while(value1<value2) {jTextArea1.append ("\n"+value1*value2); //Correction 2 & 3 value1++; //Correction 4 } </pre> <p>(½ Mark for each correct correction)</p> | | | | | | | | |
| (f) | <p>Mr. Ashish works as a programmer in “Universal Technologies Pvt. Ltd.”. He has designed a Library software to generate the membership fee depending upon the membership type considering discount eligibility as well. A screenshot of the same is shown below:</p>  <p>Help him in writing the code to do the following:</p> <p>i. After selecting appropriate Radio Button, when ‘Check Fee’ button is clicked, fee should be displayed in the respective text field according to the following criteria:</p> <table border="1" data-bbox="331 1742 879 1933"> <thead> <tr> <th>Membership Type</th> <th>Fee</th> </tr> </thead> <tbody> <tr> <td>Monthly</td> <td>500</td> </tr> <tr> <td>Quarterly</td> <td>1000</td> </tr> </tbody> </table> | Membership Type | Fee | Monthly | 500 | Quarterly | 1000 | | |
| Membership Type | Fee | | | | | | | | |
| Monthly | 500 | | | | | | | | |
| Quarterly | 1000 | | | | | | | | |

| | <table border="1"> <tr> <td>Yearly</td> <td>1500</td> </tr> </table> <p>ii. After selecting appropriate Radio Button, when 'Check Discount' button is clicked, appropriate discount should be displayed in the respective text field according to the following criteria:</p> <table border="1"> <thead> <tr> <th>Discount Eligibility</th> <th>Discount</th> </tr> </thead> <tbody> <tr> <td>Students</td> <td>200</td> </tr> <tr> <td>Other</td> <td>100</td> </tr> </tbody> </table> <p>iii. When 'Calculate' button is clicked, Net Fee should be calculated and displayed in the respective text field as per the given formula:</p> $\text{Net Fee} = \text{Fee} - \text{Discount}$ <p>iv. When 'Clear All' button is clicked, All the text fields should be cleared.</p> | Yearly | 1500 | Discount Eligibility | Discount | Students | 200 | Other | 100 | 6 |
|----------------------|--|--------|------|----------------------|----------|----------|-----|-------|-----|---|
| Yearly | 1500 | | | | | | | | | |
| Discount Eligibility | Discount | | | | | | | | | |
| Students | 200 | | | | | | | | | |
| Other | 100 | | | | | | | | | |
| Ans | <p>i. Code for 'Check Fee' button:</p> <pre>if (jRadioButton1.isSelected()) jTextField3.setText("500"); else if (jRadioButton2.isSelected()) jTextField3.setText("1000"); else if (jRadioButton3.isSelected()) jTextField3.setText("1500");</pre> <p>(2 Mark for correct code)</p> <p>ii. Code for 'Check Discount' button</p> <pre>if(jRadioButton4.isSelected()) jTextField4.setText("200"); else if(jRadioButton5.isSelected()) jTextField4.setText("100");</pre> <p>(2 Mark for correct code)</p> <p>iii. Code for 'Calculate' button</p> <pre>int fee=Integer.parseInt(jTextField3.getText()); int disc=Integer.parseInt(jTextField4.getText()); int net=fee-disc; jTextField5.setText(""+net);</pre> <p>(1 Mark for correct code)</p> <p>iv. Code for 'Clear All' button</p> | | | | | | | | | |

| | <pre> jTextField1.setText(""); jTextField2.setText(""); jTextField3.setText(""); jTextField4.setText(""); jTextField5.setText(""); </pre> <p>(1 Mark for correct code)</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
|-----------|--|---|-------------------------------------|------|---------|---------|-----------|--------------|------------|------------------------------|-----------|--------------|------------|-------------------------------------|-----------|---------------|------------|--------------------------------|-----------|---------------|------------|--------------------------|-----------|---------------|------|-------------------------------------|-----------|--------------|------------|-------------------------------|--|
| 5 | (a) | Write the output of the following SQL queries: SELECT POW(INSTR('My_Database','_'),2); | 1 | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| | Ans: | Output: 9 <i>(1 mark for the correct output)</i> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| | (b) | Is NULL and 0(zero) same?Justify your answer. | 1 | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| | Ans: | No, it's not the same as null means a value that is unavailable, unassigned or unknown and zero is a defined value. <i>(1 mark for the correct answer)</i> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| | (c) | Observe the given table carefully and answer the following questions: | 2 | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| | | <table border="1"> <thead> <tr> <th>PanNo</th> <th>Name</th> <th>Phoneno</th> <th>Address</th> </tr> </thead> <tbody> <tr> <td>CIZPW123A</td> <td>Rajesh Kumar</td> <td>9599123456</td> <td>WZ11 – Rajouri Garden, Delhi</td> </tr> <tr> <td>ABWQ2341B</td> <td>Hemant Kumar</td> <td>9812345678</td> <td>Modern Apartments, Pitampura, Delhi</td> </tr> <tr> <td>DERA9786T</td> <td>Naveen Sharma</td> <td>7868654235</td> <td>CA 22, Sector 21 Rohini, Delhi</td> </tr> <tr> <td>PARD3457L</td> <td>Sourabh Verma</td> <td>8933217645</td> <td>JD 61, Sector20, Gurgaon</td> </tr> <tr> <td>GDTF8762P</td> <td>Nishant Kumar</td> <td>NULL</td> <td>Modern Apartments, Pitampura, Delhi</td> </tr> <tr> <td>MERT2376G</td> <td>Hemant Kumar</td> <td>9811110891</td> <td>F40, Sector 19, Rohini, Delhi</td> </tr> </tbody> </table> <p>i. Name the column that might have a Primary Key constraint. Justify your answer.</p> <p>ii. Name the column that might have a Unique constraint. Justify your answer.</p> | PanNo | Name | Phoneno | Address | CIZPW123A | Rajesh Kumar | 9599123456 | WZ11 – Rajouri Garden, Delhi | ABWQ2341B | Hemant Kumar | 9812345678 | Modern Apartments, Pitampura, Delhi | DERA9786T | Naveen Sharma | 7868654235 | CA 22, Sector 21 Rohini, Delhi | PARD3457L | Sourabh Verma | 8933217645 | JD 61, Sector20, Gurgaon | GDTF8762P | Nishant Kumar | NULL | Modern Apartments, Pitampura, Delhi | MERT2376G | Hemant Kumar | 9811110891 | F40, Sector 19, Rohini, Delhi | |
