

**Strictly Confidential – (For Internal and External use only)**  
**ALL INDIA SENIOR SCHOOL CERTIFICATE EXAMINATION, 2018**  
**Marking Scheme – Geography (Theory) Q.P. CODE 64/1, 64/2, 64/3**

**General Instructions:**

1. The Marking scheme provides general guidelines to reduce subjectivity in the marking.  
The answer given in the marking Scheme are suggestive answers. The content is thus indicative. **If a student has given any other answer which is different from the one given in the marking Scheme, but conveys the meaning, such answer should be given due weightage.**
2. Evaluation is to be done as per instruction provided in the Marking Scheme. Marking Scheme should be strictly adhered to and religiously followed.
3. If a question has parts please award marks on the right hand side for each part. Marks awarded for different parts of the question should then be totaled up and written on the left hand margin and encircled.
4. If a question does not have parts, marks for it be awarded on the left hand side and encircled.
5. If a candidate has attempted an extra question, answer of the question deserving more marks should be retained and the other answer scored out.
6. The following Textbooks can be referred to for detailed answers. Page number of the concerned book is given on the right side of the answer of each question.

**Textbook I (TB-1) Fundamentals of Human Geography, published by NCERT.**

**Textbook II (TB-2) India: People and Economy, published by NCERT.**

7. **A full scale of Marks 0-100 has to be used. Please do not hesitate to award fullmarks if the answer deserves it. Marks should not be deducted for bad handwriting and spelling mistakes.**

**Specific Instructions:**

1. The Marking Scheme carries only suggested value points for the answers, these are only guidelines and do not constitute the complete answer. The students can have their own expression and if the expression is correct, the marks should be awarded accordingly.
2. As per orders of the Hon'ble Supreme Court, the candidates would be permitted to obtain photocopy of the Answer Book on request on payment of the prescribed fee. All examiners/ Head Examiners are once again reminded that they must ensure that evaluation is carried out strictly as per value points per each answer as given in the Marking Scheme.
3. All the Head Examiner/ Examiners are instructed that while evaluating the answer scripts, if the answer is found to be totally incorrect then (x) should be marked on the incorrect answer and awarded '0' marks.

<b>19</b>	<p><b>The decadal and annual growth rate of population in India:</b></p> <p>The decades between 1921 to 1951 recorded steady growth of population.</p> <p>Overall improvement in health and sanitation minimized the mortality rate but the birth rate remained high.</p> <p>In the next three decades 1951-81 are known as the period of population explosion. It was caused by a rapid fall in the mortality rate but birth rate remained high.</p> <p>Average annual growth rate was very high as the living conditions of people improved due to developmental activities resulting in high natural increase in birth rate and thus, growth rate remained high. International migration also contributed to the high growth rate of population.</p> <p>Since 1981 till date, population growth rate has been high although a downward trend of crude birth rate has started.</p> <p><b>NOTE:</b> If examinee proves the statement by giving arguments in favour of annual / decadal / phase wise growth, in that case this may be considered.</p> <ul style="list-style-type: none"> <li>• <b>To be assessed as a whole.</b></li> </ul>	<p><b>5,7</b></p> <p><b>TB:II</b></p>	<p><b>5</b></p>
<b>20</b>	<p><b>Non-conventional sources of energy:</b></p> <ul style="list-style-type: none"> <li>• Non-conventional energy sources are solar, wind, tidal, geothermal and biomass. All these sources are sustainable.</li> <li>• These are more equitably distributed</li> <li>• They are ecofriendly.</li> <li>• In the long run they are cost effective.</li> <li>• Wind energy like other non-conventional sources of energy is absolutely pollution free.</li> <li>• Ocean currents are store house of infinite energy.</li> <li>• Bio energy is also a potential source of energy. It reduces pressure on fuel wood and saves forests as well.</li> <li>• Geo thermal energy can successfully be tapped, converted to electrical energy and can be</li> </ul>	<p><b>80</b></p> <p><b>TB:II</b></p>	<p><b>5×1=5</b></p>
