31	The points to be considered before making investment in a database: (any three)	3	
	(i) What all data is to be stored in the database?		
	(ii) Who will capture or modify the data, and how frequently the data will be modified?		
	(iii) Who will be using the database, and what all tasks will they perform?		
	(iv) Will the database (backend) be used by any other frontend application?		
	(v) Will access to database be given over LAN/ Internet, and for what purposes?		

	(vi) What level of hardware and operating system is available?	
32	Types of Accounting Vouchers	3
	(i) Contra Vouchers	
	(ii) Payments Vouchers	
	(iii) Receipt Vouchers	
33	Uses of conditional formatting:	4
	(i) It helps in making needed information highlighted.	
	(ii) It changes the appearance of cells ranges.	
	(iii) Color scale may be used to highlight cells.	
	(iv) useful in making decision making.	
	Or	
	Features of computerized accounting system:	
	(i) Simple and integrated.	
	(ii) Transparency and control.	
	(iii) Accuracy and speed.	
	(iv) Scalability.	
2.4	(v) Reliability.	
34	Two basic methods of charging depreciation are:	6
	Straight line method: This method calculates fixed amount of depreciation every year which is	
	calculated keeping in view the useful life of assets and its salvage value at the end of its useful life.	
	Written down value method: This method uses current book value of the asset for computing the	
	amount of depreciation for the next period. It is also known as declining balance method.	
	Differences:	
	 Equal amount of depreciation is charged in straight line method. Amount of depreciation goes on decreasing every year in written down value method. 	
	2. Depreciation is charged on original cost in straight line method. The amount is calculated	
	on the book value every year.	
	3. In straight line method the value of asset can come to zero but in written down value	
	method this can never be zero.	
	4. Generally rate of depreciation is low in case of straight line method but it is kept high in	
	case of written down value method.	
	5. It is suitable for assets in which repair charges are less and the possibility of obsolescence is less. It is suitable for the assets which become obsolete due to changes in technology.
