

Maximum Marks: 35

Time Allowed: 90 Minutes

General Instructions:

1. The Question Paper contains three sections A, B and C.
2. Section A has 25 questions. Attempt any 20 questions.
3. Section B has 24 questions. Attempt any 20 questions.
4. Section C has 6 questions. Attempt any 5 questions.
5. All questions carry equal marks.
6. There is no negative marking.

SECTION A

This Section A has 25 Multiple Choice Questions. Attempt any 20 questions.

- 1) Which is the included angle of a regular hexagon?
 - a) 30°
 - b) 60°
 - c) 90°
 - d) 120°
- 2) Name the projection with multiple views.
 - a) Perspective projection
 - b) Isometric projection
 - c) Orthographic projection
 - d) Oblique projection
- 3) Name the solid with apex.
 - a) Cone
 - b) Square prism
 - c) Triangular Prism
 - d) Sphere
- 4) Name the type of line which is used for dimensioning.
 - a) Small dash line
 - b) Chain line
 - c) Wavy line
 - d) Thin continuous line
- 5) Which is the correct sequence in case of first angle method of projection?
 - a) Observer, Plane of projection, Object
 - b) Observer, Object, Plane of projection
 - c) Object, Plane of projection, Observer
 - d) Object, Observer, Plane of projection
- 6) What is the thread angle of a metric thread?
 - a) 40°
 - b) 60°
 - c) 80°
 - d) 100°
- 7) The angle between the flanks of a BSW thread profile is?

- a) 60°
 - b) 90°
 - c) 55°
 - d) 45°
- 8) Usually the section lines are inclined with horizontal line at.
- a) 45°
 - b) 35°
 - c) 25°
 - d) 15°
- 9) Which one of these is a temporary fastening?
- a) Welding
 - b) Nut-Bolt
 - c) Riveting
 - d) Pasting
- 10) Which among these is used for power transmission?
- a) Square thread
 - b) BSW thread
 - c) Metric thread internal
 - d) Metric thread external

FILL IN THE BLANKS

- 11) _____ is the projection used in engineering practices.
- a) Isometric projection
 - b) Oblique projection
 - c) Perspective projection
 - d) Inclined projection
- 12) _____ projection gives the true size of the object.
- a) Isometric
 - b) orthographic
 - c) Oblique
 - d) Perspective
- 13) The isometric length of 70 mm is _____.
- a) Equal to true 70 mm
 - b) Less than true 70 mm
 - c) More than true 70 mm
 - d) Equal to true 100 mm.
- 14) The angle between the main scale and isometric scale is _____.
- a) 15°
 - b) 30°
 - c) 45°
 - d) 90°
- 15) The shape of circle in isometric projection is _____.
- a) Cycloid
 - b) Circle
 - c) Parabola
 - d) Ellipse

- 16) The angle of chamfer is usually _____ with the base of a hexagonal nut.
a) 10°
b) 20°
c) 30°
d) 40°
- 17) The full form of B. S. W. thread is _____.
a) Bureau of Standard Width
b) Bureau of Standard Whitworth
c) British Standard Width
d) British Standard Whitworth
- 18) Knuckle thread is a modified form of a _____ screw thread.
a) Square
b) BSW
c) Metric
d) V – thread

CHOOSE THE MOST APPROPRIATE FIGURE

- 19) A vertical square prism with its axis perpendicular to HP and parallel to VP

- 20) A horizontal solid

21) A hemisphere resting on HP with its circular face on it

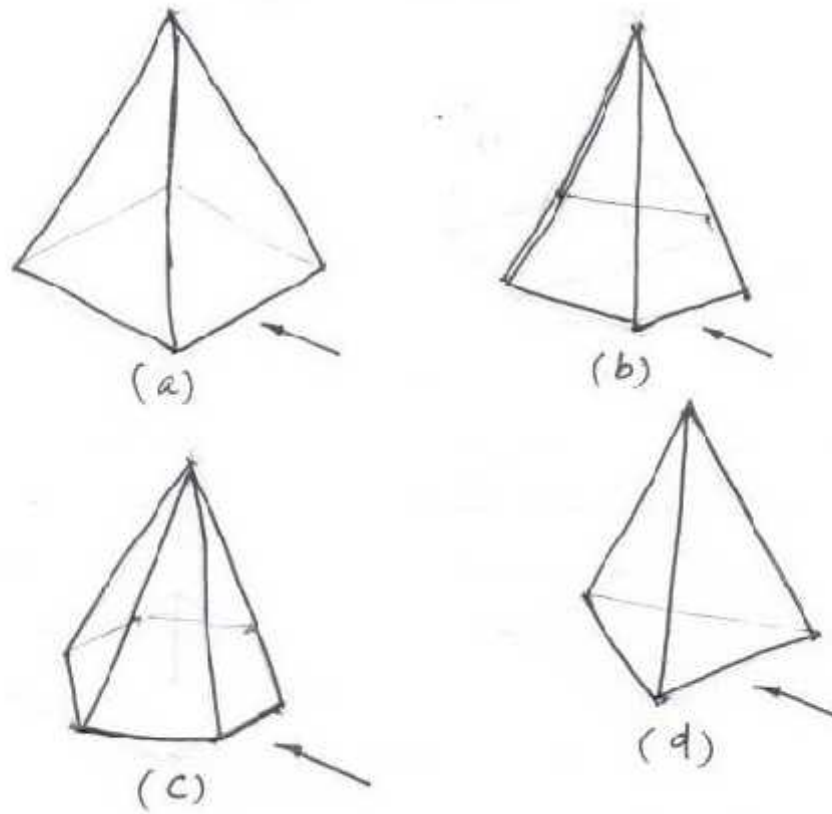

22) An inverted solid

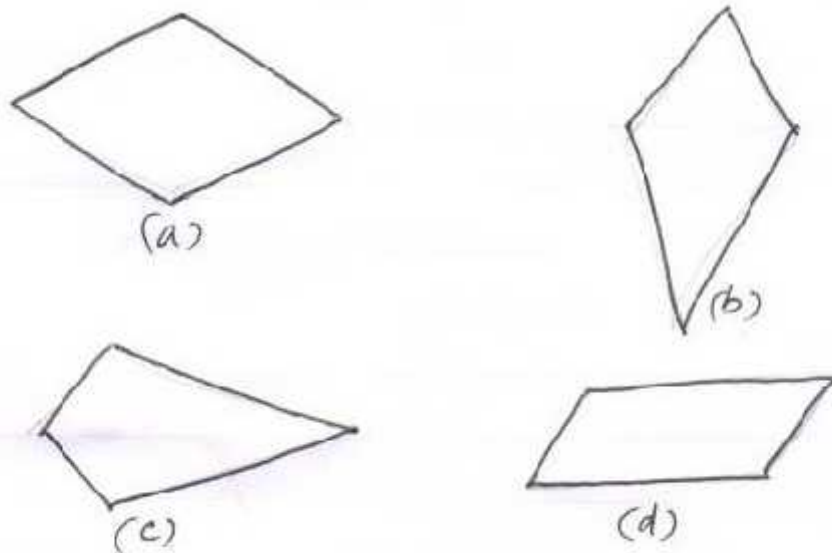

23) A solid resting on one of its long edges

24) A vertical hexagonal pyramid

25) Isometric projection of a horizontal square

SECTION B

This Section B has 24 Multiple Choice Questions. Attempt any 20 questions.

26)

- a) The base edge of a cube is not equal to its height.
- b) The base edge of a cube is equal to its height.
- c) A cube has eight faces.
- d) A cube has an apex.

27)

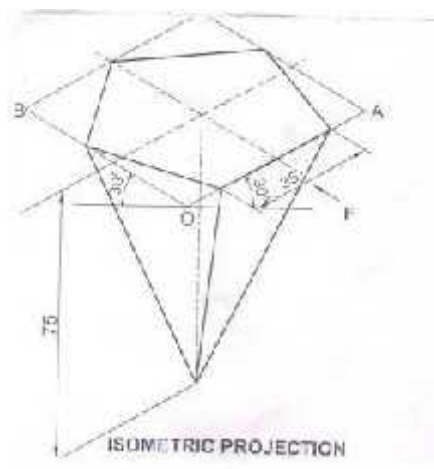

- a) Axis of the prism is perpendicular to H.P.
- b) Axis of the prism is parallel to V.P.
- c) Hexagonal ends of the prism are perpendicular to V.P.
- d) Hexagonal ends of the prism are parallel to V.P.

28)

- a) The cylinder is resting on H.P. with one of its long edges on it.
- b) The cylinder is resting on H.P. with its base on it.
- c) The cylinder is resting on H.P. with one of its rectangular faces on it.
- d) The cylinder is resting on H.P. with its axis parallel to both H.P. and V.P.

29)

- a) The axis is inclined to H.P.
- b) The axis is inclined to V.P.
- c) The axis is perpendicular to H.P. and parallel to V.P.
- d) The axis is perpendicular to V.P. and parallel to H.P.

30)

- a) One of the base sides of the pentagonal pyramid is perpendicular to V.P.
- b) One of the base sides of the pentagonal pyramid is parallel to V.P.
- c) One of the base sides of the pentagonal prism is perpendicular to V.P.
- d) One of the base sides of the pentagonal prism is parallel to V.P.

31)

- a) The common axis is perpendicular to HP and parallel to VP
- b) The common axis is perpendicular to VP and parallel to HP
- c) The axis of the prism is parallel to HP and the axis of the pyramid is perpendicular to HP
- d) The axis of the prism is perpendicular to HP and the axis of the pyramid is parallel to HP

32)

- a) The top solid is square prism and the bottom solid is triangular prism.
- b) The top solid is triangular prism and the bottom solid is square prism.
- c) Both the solids are square prisms.
- d) Both the solids are triangular prisms.

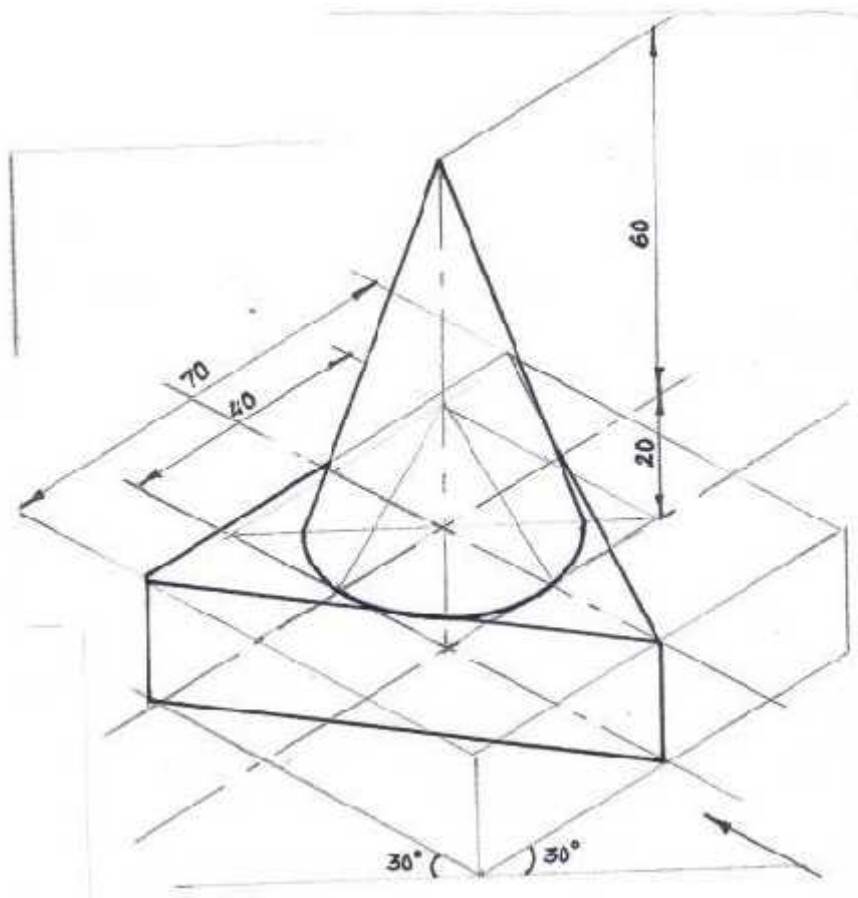

33)

- a) The size of common axis is true 90mm.
- b) The size of common axis is less than true 90mm.
- c) The size of common axis is more than true 90mm.
- d) The size of common axis is true 100mm.

SELECT THE CORRECT OPTION CORRESPONDING TO THE ORIENTATION OF THE GIVEN ISOMETRIC PROJECTION OF COMBINATION OF SOLIDS.

34)

- a) Both the solids are vertical and one of the base edges of the prism is parallel to VP and nearer the observer.
- b) Both the solids are vertical and one of the base edges of the prism is perpendicular to VP.
- c) Both the solids are vertical and one of the base edges of the prism is parallel to VP and near it.
- d) Both the solids are vertical and two of the base edges of the prism are parallel to VP.

35)

- a) The common axis is perpendicular to HP and two of the base edges of the prism are perpendicular to VP
- b) The common axis is perpendicular to VP and two of the base edges of the prism are perpendicular to VP
- c) The common axis is perpendicular to HP and two of the base edges of the prism are parallel to VP
- d) The common axis is perpendicular to VP and two of the base edges of the prism are parallel to VP

36)

- a) A hemisphere is kept centrally on the top hexagonal surface of a hexagonal prism with its curved surface on it.
- b) A sphere is kept centrally on the top hexagonal surface of a hexagonal prism with its curved surface on it.
- c) A hemisphere is kept centrally on the top rectangular face of a hexagonal prism with its curved surface on it.
- d) A sphere is kept centrally on the top rectangular face of a hexagonal prism with its curved surface on it.

37)

- a) A vertical square pyramid is kept on a vertical circular disc.
- b) A vertical triangular pyramid is kept on a vertical square slab.
- c) A vertical square pyramid is kept on a vertical square slab.
- d) A vertical triangular pyramid is kept on a vertical circular disc.

38)

- a) The isometric projection of a sphere is a circle whose diameter is equal to the isometric diameter of the sphere.
- b) The isometric projection of a sphere is a circle whose diameter is equal to the true diameter of the sphere.
- c) The isometric projection of a sphere is a circle whose diameter is equal to half of the true diameter of the sphere.
- d) The isometric projection of a sphere is a circle whose diameter is equal to double of the true diameter of the sphere.

39)

- a) Axis of both prism and cylinder are perpendicular to HP.
- b) Axis of both prism and cylinder are perpendicular to VP.
- c) Axis of prism is perpendicular to VP and axis of cylinder is perpendicular to HP.
- d) Axis of prism is perpendicular to HP and axis of cylinder is perpendicular to VP.

40)

- a) A vertical cylinder of base diameter 40 mm is placed centrally on a hexagonal prism which is resting on HP with one of its long edges on it.
- b) A vertical cylinder of base diameter 40 mm is placed centrally on a pentagonal prism which is resting on HP with one of its long edges on it.
- c) A vertical cylinder of base diameter 40 mm is placed centrally on a pentagonal prism which is resting on HP with one of its rectangular faces on it.
- d) A vertical cylinder of base diameter 40 mm is placed centrally on a hexagonal prism which is resting on HP with one of its rectangular faces on it.

41)

- a) A vertical pentagonal pyramid with one of its base edges parallel to VP is placed centrally on a horizontal square prism with its square ends parallel to VP.
- b) A vertical pentagonal pyramid with one of its base edges perpendicular to VP is placed centrally on a horizontal square prism with its square ends perpendicular to VP.
- c) A vertical hexagonal pyramid with two of its base edges perpendicular to VP is placed centrally on a horizontal square prism with its square ends parallel to VP.
- d) A vertical hexagonal pyramid with two of its base edges parallel to VP is placed centrally on a horizontal square prism with its square ends perpendicular to VP.

TWO STATEMENTS ARE GIVEN – ONE LABELLED ASSERTION (A) AND THE OTHER LABELLED REASON (R). SELECT THE CORRECT ANSWER TO THE FOLLOWING QUESTIONS FROM THE CODES (a), (b), (c) AND (d) AS GIVEN BELOW:

- a) Both A and R are true and R is the correct explanation of A.
- b) Both A and R are true and R is not the correct explanation of A.
- c) A is true but R is false.
- d) A is false and R is also false.

- 42) A: Knuckle thread is a modification of a square thread.
R: Knuckle threads are used in electric bulbs.
- 43) A: The portion between the crest and root is called flank.
R: The angle between the flanks in a metric thread is 90° .
- 44) A: The actual depth of square thread is given as $0.96P$, where P represents the pitch of thread.
R: The portion between crest and root is called as pitch.
- 45) A: Left hand thread is represented by LH thread.
R: Usually all the jewellery mating pieces have LH threads.
- 46) A: Chamfering on a nut is the process of removing sharp corners by rounding off the corners.
R: Chamfering is done on a nut to ensure the safety of the user.
- 47) A: A plain washer is a circular plate having a hole in its centre.
R: If the nominal diameter of the bolt on which the washer is used is D , then the inner diameter of the washer is given as $2D+6$.
- 48) A: The angle of chamfer is 60° with the base of a nut.
R: A hexagonal headed bolt cannot be used with a hexagonal nut.
- 49) A: Triple start threads are more useful when a quick advance is required in a screwed pair, than single start threads.
R: If L represents Lead and P the pitch of the screw threads,
 $L = P$ in the case of single start thread.
 $L = 3P$ in the case of triple start threads.

SECTION C

This Section C has 6 Multiple Choice Questions. Attempt any 5 questions.

ANSWER THE FOLLOWING QUESTIONS AFTER READING THE GIVEN PASSAGE:

Amit buys a football as a gift for his brother. The radius of the football is 15 cm. He packs it in a square box (cube) which is just fit enough. His brother is very happy. He is a footballer and he also loves to sketch. He sketches a 3-D model of this football placed on the apex of a triangular pyramid, making it look like a trophy. He might 3-D Print his model as an inspiration. He is aspiring to win the Inter-School Football Championship this year.

- 50) What will be the minimum dimension of side of the gift-box (cube)?
- a) 15 cm
 - b) 30 cm
 - c) 45 cm
 - d) 60 cm
- 51) If he has used isometric projection method to obtain the 3 – D model, then the size of the football drawn will be
- a) double
 - b) foreshortened
 - c) same
 - d) halved
- 52) The isometric projection of the equilateral triangular base of his model will be
- a) an equilateral triangle
 - b) an isosceles triangle
 - c) a scalene triangle
 - d) a right angled triangle
- 53) What is the orientation of the common axis of these two solids?
- a) Axis parallel to HP and VP
 - b) Axis perpendicular to HP
 - c) Axis perpendicular to VP
 - d) None of the above

- 54) In case he uses a triangular prism instead of the pyramid, what will be the height of his trophy?
- a) It remains same
 - b) It becomes double
 - c) It becomes half
 - d) It becomes triple
- 55) He used _____ in his isometric projection method.
- a) True scale
 - b) Vernier scale
 - c) Diagonal scale
 - d) Isometric scale
