31	Text material: Since crop production often depended on seasonal monsoon rains, scholars worked out methods to predict rainfall. Kṛṣiparāśara and Bṛhat Saṁhitā describe such methods in every season. Parāśara’s main technique was based on the positions of the Moon and the Sun in the sky. Varāhamihira in his Bṛhat Saṁhitā considered lunar mansions (nakṣatras) in predicting seasonal rainfall. Because of the confidence they have in ancient methods, a large number of farmers in India even today carry out farm operations based on them. i) Based on the passage /text extract given above – and the methods used by farmers even today to predict the monsoons, how would you evaluate the Indian Farmer’s dependence on these predictions?	3
31	TEXT MATERIAL: Varāhamihira’s chapter on treatment of trees mentioned that trees are vulnerable to disease when exposed to cold weather, strong winds, and hot sun; this possibly laid the foundation of classifying tree diseases based on humours such as vāta, pitta and kapha. Surapāla suggests using a number of plant species that we know today have antimicrobial properties, including mustard paste and milk. ii) Based on this textual material -what can we infer about the ancient practices of management of crop diseases?	2
